

## CareFirst Preferred Drug List - Formulary 2

The **CareFirst Preferred Drug List** is a guide to help you identify products that are both clinically appropriate and cost-effective. These drugs are selected for their quality, effectiveness and cost based on current medical research and input from a committee of doctors and pharmacies who serve the CareFirst region.

The drugs on the Preferred Drug List are grouped into therapeutic categories for representational purposes only. This list represents brand-name drugs in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generic drugs should be considered the first line of prescribing; however, if there is no generic available, there may be more than one brand-name drug to treat a condition.

**Please note this list does not include all covered drugs and is subject to change.**

### PLAN MEMBER

Ask your doctor to consider prescribing, when appropriate, a preferred drug from this list. Take this list along when you or a covered family member sees a doctor.

#### Please note:

- Our Pharmacy Benefit Manager, CVS Caremark<sup>®</sup>, may contact your doctor after receiving your prescription to request consideration of a generic equivalent or preferred brand drug, which may lower your out of pocket costs.
- In most cases, when a generic becomes available for a brand-name drug, the brand-name drug is moved to the non-preferred brand category, which may have a higher cost-share.
- Check your specific prescription benefit plan design to determine your cost-share for a specific product on this list.
- Your specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the U.S. Food and Drug Administration (FDA) may not be covered upon release to the market.
- To learn more about your specific drug benefit, log into *My Account* at [www.carefirst.com/myaccount](http://www.carefirst.com/myaccount) and click on Drug & Pharmacy Resources under Quick Links or call CareFirst Pharmacy Services at 800-241-3371.

### HEALTH CARE PROVIDER

As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

#### Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It does not include all covered drugs and does not guarantee coverage. The member's specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the FDA may not be covered upon release to the market.
- The member's prescription benefit plan may have a different copay/coinsurance for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.

**FOR YOUR INFORMATION: Generics should be considered the first line of prescribing.** This drug list represents a summary of prescription coverage. It does not list all covered drugs and does not guarantee coverage. New-to-market products and new variations of products already in the marketplace may not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval. In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market and will be removed from the Preferred Drug List. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay/coinsurance for specific products on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generics listed in therapeutic categories are for representational purposes only. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. To learn more about your specific drug benefit, log into *My Account* at [www.carefirst.com/myaccount](http://www.carefirst.com/myaccount) and click on Drug & Pharmacy Resources under Quick Links or call CareFirst Pharmacy Services at 800-241-3371.

An exception process may exist for specific clinical or regulatory circumstances that may require coverage of an excluded medication.

§ Generics are available in this class and should be considered the first line of prescribing.

^ Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.

<sup>1</sup> Listing does not include certain NDCs^.

\* The preferred options in this list are a broad representation within therapeutic categories of available treatment options and do not necessarily represent clinical equivalency.

<sup>1</sup> CVS Caremark is an independent company that provides pharmacy benefit management services.

<sup>2</sup> An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK or ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.

<sup>3</sup> BD ULTRAFINE syringes and needles are the only preferred options.

<sup>4</sup> ACCU-CHEK or ONETOUCH brand test strips are the only preferred options.

<sup>5</sup> Generic prenatal vitamins and CITRANATAL are the only preferred options.

<sup>6</sup> Long Acting Insulins - First Generation.

# CareFirst Formulary 2 with ACSF

The **CareFirst Formulary 2 with ACSF List** is a guide to help you identify products that are both clinically appropriate and cost-effective. These drugs are selected for their quality, effectiveness and cost based on current medical research and input from a committee of doctors and pharmacies who serve the CareFirst region.

The drugs on the list are grouped into therapeutic categories for representational purposes only. This list represents brand-name drugs in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generic drugs should be considered the first line of prescribing; however, if there is no generic available, there may be more than one brand-name drug to treat a condition.

**Please note this list does not include all covered drugs and is subject to change.**

## PLAN MEMBER

Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

### Please note:

- Our Pharmacy Benefit Manager, CVS Caremark® may contact your doctor after receiving your prescription to request consideration of a generic equivalent or preferred brand drug, which may lower your out-of-pocket costs.
- In most cases, when a generic becomes available for a brand-name drug, the brand-name drug is moved to the non-preferred brand category, which may have a higher cost-share.
- Check your specific prescription benefit plan design to determine your cost-share for a specific product on this list.
- Your specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document.
- To learn more about your specific drug benefit, log into *My Account* at [www.carefirst.com/myaccount](http://www.carefirst.com/myaccount) and click on Drug & Pharmacy Resources under Quick Links or call CareFirst Pharmacy Services at 800-241-3371.

## HEALTH CARE PROVIDER

As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

### Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It does not include all covered drugs and does not guarantee coverage. The member's specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document.
- The member's prescription benefit plan may have a different copay/coinsurance for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.

**FOR YOUR INFORMATION: Generics should be considered the first line of prescribing.** This drug list represents a summary of prescription coverage. It does not list all covered drugs and does not guarantee coverage. In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market and will be removed from the Preferred Drug List. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay/coinsurance for specific products on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generics listed in therapeutic categories are for representational purposes only. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. To learn more about your specific drug benefit, log into *My Account* at [www.carefirst.com/myaccount](http://www.carefirst.com/myaccount) and click on Drug & Pharmacy Resources under Quick Links or call CareFirst Pharmacy Services at 800-241-3371.

An exception process may exist for specific clinical or regulatory circumstances that may require coverage of an excluded medication.

- § Generics are available in this class and should be considered the first line of prescribing.
- \* The preferred options in this list are a broad representation within therapeutic categories of available treatment options and do not necessarily represent clinical equivalency.
- <sup>1</sup> For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).
